

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II,  
as amended by Regulation (EU) No. 2020/878 - Europe

**Product:**  
**AQUAEPOX Comp. A**

Version 1.08 / 16.04.2024

Replaces all previous versions

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

Product name: AQUAEPOX COMP. A

Synonym UFI: Base for multi-component product

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Application of the substance/the mixture: Industrial use

### 1.3 Details of the supplier of the safety data sheet

Company: PINTURAS KILNHER  
Address: Pol. Ind. La Figuera, C/LLanterners, 44. 46394  
City: ALACUAS  
Province: VALENCIA  
Telephone: (+34) 961 505 024  
Fax: (+34) 961 505 024  
E-mail: kilnher@kilnher.com  
Web: www.kilnher.com

### 1.4 Emergency telephone number

(+34) 961 505 024 (Only available during office hours; Monday-Friday; 07:00-15:00)

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard class	Hazard category	Indications of danger	Causes
Eye irritation	2	H319	Causes serious eye irritation
Skin irritation	2	H315	Causes skin irritation
Specific target organ toxicity - single exposure	3	H335	May cause respiratory irritation
Skin sensitization	1	H317	May cause an allergic skin reaction

## 2.2 Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

### Hazard pictograms

### Signal word

Warning

### Hazard statements

**H319** Causes serious eye irritation.  
**H315** Causes skin irritation.  
**H335** May cause respiratory irritation.  
**H317** May cause an allergic skin reaction.

### Contains

TEPAADDUCT POLYMER  
Fatty acids, C18-unsatd., Dimers, polymers with tall-oil fatty acids and triethylenetetramine

### Precautionary statements

**P280** Wear protective gloves / eye protection / face protection.  
**P261** Avoid breathing dust / fume / gas / mist / vapours / spray.  
**P312** Call a POISON CENTRE / doctor / . . . if you feel unwell.  
**P403+P233** Store in a well-ventilated place. Keep container tightly closed.  
**P264** Wash with water thoroughly after handling.  
**P362+P364** Take off contaminated clothing and wash it before reuse.

## 2.3 Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%. The product does not contain substances with endocrine disrupting properties in concentration  $\geq$  0.1%.

## SECTION 3: Composition/information on ingredients

### 3.1 Substances

Not applicable

### 3.2 Mixtures

Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
WATER	INDEX - EC 231-791-2 CAS 7732-18-5	50 ≤ x < 54	-
TEPA ADDUCT POLYMER	INDEX - EC - CAS 117317-22-3 REACH Reg. POLIMERO	40 ≤ x < 42,5	Eye Irrit. 2 H319, Skin Irrit. 2 H315, STOT SE 3 H335, Skin Sens. 1 H317
Fatty acids, C18-unsatd., Dimers, polymers with tall-oil fatty acids and triethylenetetramine	INDEX - EC - CAS 68082-29-1 REACH Reg. POLYMER	10 ≤ x < 11,5	Eye Irrit. 2 H319, Skin Irrit. 2 H315, Skin Sens. 1A H317

\*The full wording of hazard (H) phrases is given in section 16 of the sheet.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

**EYES:** Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

**SKIN:** Remove contaminated clothing. Wash immediately with plenty of water. If irritation persists, get medical advice/attention. Wash contaminated clothing before using it again.

**INHALATION:** Remove to open air. In the event of breathing difficulties, get medical advice/attention immediately.

**INGESTION:** Get medical advice/attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person, unless authorised by a doctor.

### 4.2 Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

### 4.3 Indication of any immediate medical attention and special treatment needed

Information not available.

## SECTION 5: Firefighting measures

### 5.1 Extinguishing media

#### SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

#### UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

### 5.2 Special hazards arising from the substance or mixture

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products.

### 5.3 Advice for firefighters

#### GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

#### SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2 Environment related measures

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3 Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4 Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

## SECTION 7: Handling and storage

### 7.1 Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

## 7.2 Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight.

Keep containers

away from any incompatible materials, see section 10 for details.

## 7.3 Specific end use(s)

Information not available.

# SECTION 8: Exposure controls/personal protection

## 8.1 Control parameters

Information not available.

## 8.2 Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

### HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374). The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

### SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

### EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

### RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type A filter whose class (1, 2

or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required. Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited. If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

### ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

## SECTION 9: Physical and chemical properties

### 9.1 Information on basic physical and chemical properties

<b>Properties Value</b>	<b>Decomposition temperature</b> Not available
<b>Appearance</b> Liquid	<b>pH</b> 10-11
<b>Colour</b> Amber	<b>Kinematic viscosity</b> Not available
<b>Odour</b> Typical	<b>Dynamic viscosity</b> 18000 cPs (25°C)
<b>Melting point / freezing point</b> Not available	<b>Solubility</b> Soluble in water
<b>Initial boiling point</b> 180 °C	<b>Partition coefficient: n-octanol/water</b> Not available
<b>Flammability</b> Not available	<b>Vapour pressure</b> Not available
<b>Lower explosive limit</b> Not available	<b>Density and/or relative density</b> 1
<b>Upper explosive limit</b> Not available	<b>Relative vapour density</b> Not available
<b>Flash point</b> 130 °C	<b>Particle characteristics</b> Not applicable
<b>Auto-ignition temperature</b> Not available	

### 9.2 Other information

#### 9.2.1 Information with regard to physical hazard classes

Information not available

#### 9.2.2 Other safety characteristics

Total solids (250°C / 482°F) 50,00 %

## SECTION 10: Stability and reactivity

### 10.1 Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

### 10.2 Chemical stability

The product is stable in normal conditions of use and storage.

### 10.3 Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

### 10.4 Conditions to avoid

None in particular. However the usual precautions used for chemical products should be respected.

### 10.5 Incompatible materials

Information not available

### 10.6 Hazardous decomposition products

Information not available.

## SECTION 11: Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

**Metabolism, toxicokinetics, mechanism of action and other information** Information not available

**Information on likely routes of exposure** Information not available

**Delayed and immediate effects as well as chronic effects from short and long-term exposure** Information not available

**Interactive effects** Information not available

#### ACUTE TOXICITY

ATE (Inhalation) of the mixture: Not classified (no significant component)

ATE (Oral) of the mixture: Not classified (no significant component)

ATE (Dermal) of the mixture: Not classified (no significant component)

#### SKIN CORROSION / IRRITATION

Causes skin irritation

#### SERIOUS EYE DAMAGE / IRRITATION

Causes serious eye irritation

#### RESPIRATORY OR SKIN SENSITISATION

Sensitising for the skin

#### GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

#### CARCINOGENICITY

Does not meet the classification criteria for this hazard class

#### REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

#### STOT - SINGLE EXPOSURE

May cause respiratory irritation

#### STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

#### ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

### 11.2 Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

## SECTION 12: Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

### 12.1 Toxicity

Information not available

### 12.2 Persistence and degradability

Information not available

### 12.3 Bioaccumulative potential

Information not available

### 12.4 Mobility in soil

Information not available

### 12.5 Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

### 12.6 Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

### 12.7 Other adverse effects

Information not available

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

### CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

## SECTION 14: Transport information

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

### 14.1 UN number or ID number

Not applicable

### 14.3 Transport hazard class(es)

Not applicable

### 14.2 UN proper shipping name

Not applicable

### 14.4 Packing group

Not applicable

**14.5 Environmental hazards**

Not applicable

**14.7 Maritime transport in bulk according to IMO instruments**

Information not relevant

**14.6 Special precautions for user**

Not applicable

**SECTION 15: Regulatory information****15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture****Seveso Category - Directive 2012/18/EU:** None**Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006****Product Point 3****Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors** Not applicable**Substances in Candidate List (Art, 59 REACH)** On the basis of available data, the product does not contain any SVHC in percentage > than 0,1%.**Substances subject to authorisation (Annex XIV REACH)** None**Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:** None**Substances subject to the Rotterdam Convention:** None**Substances subject to the Stockholm Convention:** None**Healthcare controls**

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

**15.2 Chemical Safety Assessment**

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

**SECTION 16: Other information****16.1 Text of hazard (H) indications mentioned in section 2-3 of the sheet**

Eye Irrit. 2	Category 2	EYE IRRITATION
Skin Irrit. 2	Category 2	SKIN IRRITATION
STOT SE 3	Category 3	SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE)
Skin Sens. 1	Category 1	SKIN SENSITIZATION
Skin Sens. 1A	Category 1A	SKIN SENSITIZATION

H315	Causes skin irritation.
H317	May cause an allergic skin reaction.
H319	Causes serious eye irritation.
H335	May cause respiratory irritation.

## 16.2 Legend

**ADR:** European Agreement concerning the carriage of Dangerous goods by Road

**ATE:** Acute Toxicity Estimate

**CAS:** Chemical Abstract Service Number

**CE50:** Effective concentration (required to induce a 50% effect)

**CE:** Identifier in ESIS (European archive of existing substances)

**CLP:** Regulation (EC) 1272/2008

**DNEL:** Derived No Effect Level

**EmS:** Emergency Schedule

**GHS:** Globally Harmonized System of classification and labeling of chemicals

**IATA DGR:** International Air Transport Association Dangerous Goods Regulation

**IC50:** Immobilization Concentration 50%

**IMDG:** International Maritime Code for dangerous goods

**IMO:** International Maritime Organization

**INDEX:** Identifier in Annex VI of CLP

**LC50:** Lethal Concentration 50%

**LD50:** Lethal dose 50%

**OEL:** Occupational Exposure Level

**PBT:** Persistent bioaccumulative and toxic as REACH Regulation

**PEC:** Predicted environmental Concentration

**PEL:** Predicted exposure level

**PNEC:** Predicted no effect concentration

**REACH:** Regulation (EC) 1907/2006

**RID:** Regulation concerning the international transport of dangerous goods by train

**TLV:** Threshold Limit Value

**TLV CEILING:** Concentration that should not be exceeded during any time of occupational exposure.

**TWA:** Time-weighted average exposure limit

**TWA STEL:** Short-term exposure limit

**VOC:** Volatile organic Compounds

**vPvB:** Very Persistent and very Bioaccumulative as for REACH Regulation

**WGK:** Water hazard classes (German)

#### **16.4 Note for users**

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products.

#### **16.5 Calculation methods for classification**

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
